'THE PROTECTION OF YOUR INVESTMENT'

FRIJNS UNLIMITED

WHAT IS XPEL?

Your car's paint is put to the test every day by dirt and harsh weather. Be proactive and protect your investment with a Paint Protection Film (PPF) against stone chips, tar, scratches, bird droppings and other environmental damage.

XPEL is a special transparent film available in a glossy or matte finish. This film is not only gloss enhancing and hydrophobic, but above all self-healing and scratch resistant*.

- Heat-activated self-healing top layer
- Resistant to discoloration and stains
- Prevents paint wear
- Edge Seal Technology

At Frijns Unlimited, we install XPEL in a dust-free room equipped with a dust filter. We also use steam when installing the PPF to ensure perfect adhesion to your car.

We are an official XPEL installer. XPEL provides a warranty for a period of 10 years** on defects such as: yellowing, discoloration, cracking and blistering.

**To a certain extent.*

***As long as the film is maintained according to the guidelines indicated to monitor quality. The warranty is valid from first installation date.*

XPEL OPTIONS

ULTIMATE PLUS

ULTIMATE PLUS Paint Protection Film is a virtually invisible urethane coating that protects your car's paint from everyday damage such as scuffs, scratches, stone chips and more.

STEALTH is the paint protection film specially formulated to protect matte paint. Or give your glossy paint a whole new look by installing XPEL STEALTH!

STEALTH

INTERIOR PROTECTION

Never lose the look of a new car - keep your interior free of fine scratches, swirls and stains with XPEL's latest interior protection solutions.

XPEL UNLIMITED

With XPEL UNLIMITED, we ensure that, whenever possible, the film is placed around the edges of the car. In addition, we disassemble the car so that the film is barely visible after installation. In this we apply a 95% invisibility of edges and corners.

Of course, this option involves more work and therefore results in an additional cost of around 20%.

STANDARD OVERPLOT

The XPEL is overplotted by default, but with this option we will not disassemble the car (except for the door handles if necessary). This means that small running lines may be visible in some areas, where the film cannot be placed differently without dismantling parts.

XPEL PACKAGES

FULL BODY

Your entire car is protected from both everyday issues and road stone chips. You no longer have to worry about the paint losing value.

FRONT

Your car will be protected on the stone chips spots with the Front package.

- Full hood
